For Immediate Release

Terramac® Appoints Enviro Services as Authorized Dealer

Elburn, IL – Terramac, a leading manufacturer of innovative rubber tracked crawler carriers, expands its representation in the North American market by including Enviro Services as part of its dealer network. Enviro Services will represent the Terramac product line in northern Louisiana.

“Enviro Services is dedicated to providing their customers with superior services and quality equipment,” says Andrew Konopka, President of Terramac. “Their expertise in environmental reclamation for the pipeline industry is a natural fit for Terramac units. We’re excited to have them join our growing network.”

Enviro Services will offer Terramac’s versatile crawler carriers to deliver the pipeline industry with customized environmental control and land restoration equipment. In addition to Terramac’s three standard options – convertible dump-to-flat beds, rock dump beds and flatbeds – Enviro Services will offer environmental reclamation attachments such as hydroseeders, vacuum excavators and straw blowers. Customers at Enviro Services appreciate Terramac carriers for their unique front and rear bolt on connection system, which allows support equipment to be easily interchanged, as well as their ability to provide low ground pressure necessary for sensitive environmental work.

“Many of our customers begin their projects with a flatbed and then halfway-through have a need for a dump bed to carry heavier material,” says Chris Holomon, General Manager at Enviro Services. “Terramac’s units are exceptionally versatile as they serve both purposes and more due to their compatibility with various auxiliary options. And at full carrying capacity, the units continue to

conquer rugged terrain and travel to remote jobsites with minimal impact on the ground. We're confident our customers will see the value in Terramac crawler carriers as we do."

"Terramac is committed to providing the best full service, support and parts availability for its innovative and growing product line," says Trey Towns, Co-Owner of Enviro Services. "We're excited to offer Terramac crawler carriers to our customers and we look forward to a lasting partnership."

Enviro Services specializes in providing restoration services for the pipeline industry with its top-notch equipment rentals, restoration materials and environmental control devices that help return land back to its natural state. They offer the full line of Terramac crawler carriers for sale or rent as well as full service maintenance and parts from their Farmerville, LA location. For more information on Enviro Services please call 318-368-9111 or visit www.enviroservicesllc.com.

Terramac® LLC, based in Elburn, IL, was established to produce the world's leading crawler carriers. Units are sold through a full dealer network which offers customers easy-to-locate parts and service throughout the world. The units can be customized with support equipment to serve many industries such as pipeline, utility, mining, environmental, general construction and more.
